

TECHNICAL RIDER

1-2s

BUILDING UP	the cast will arrive 1,5 hours prior to the start of the performance
BREAKING DOWN	30 minutes
DURATION DANCE DUET	10 minutes
DURATION WORKSHOP	50 minutes
FLOORSPACE DUET	minimum of 4 x 4 meters
FLOORSPACE WORKSHOP	minimum of 6 x 10 meters
MATERIAL FLOORSPACE	sprung floor/gym floor
TEMPERATURE OF THE VENUE	at least 18 gr. C
MAXIMUM AUDIENCE	35 children per performance

Set

We will bring our own red dance-vinyl of 3,5 by 3,5 meters and lay this in the middle of the venue. After the duet, the venue will be used for dance workshop. To provide enough space for children to move around freely, the room should be at least 6 x 10 metres.

Venue

The venue needs to be clean and free from obstacles. We will use a regular 220 volt power outlet to power the sound system.

Please be aware that spaces surrounding the performance venue might experience a certain degree of sound pollution during the dance duet and workshop. Even though our sound levels are not particularly loud, sound could travel through the walls.

Because of noise disturbance, it is not possible to simultaneously schedule other activities in the venue as we perform. Even gyms with separated spaces are excluded.

Dressing room

We would like to use a separate space that can serve as a dressing room where the dancers can change and warm up.

Company

The company consists of 2 dancers, a workshop leader and a technician.

Contact
