<b>TECHNICIANS COMPANY</b>	2 employees
<b>TECHNICIANS VENUE</b>	2 employees

*During school performances there will be a talk with the pupils before and after the performance. The talk after will approximately take 10 minutes.*

---

#### **Lights**

We would like to use the light kit of the venue, we will bring our own light board. Floor lights will be provided by us as well. We do request 2 floor channels on stage.

#### **Sound**

We would like to use the sound board, front of house and a pair of monitors from the venue. We will bring our own laptop as an audio source.

#### **Video**

We will bring our own projector. We will hang this at 5 meters distance from our set. All video equipment will be provided by us.

**Masking**

We would like to use the masking of the venue. We need at least one wing on both sides of one meter wide at 6 meters depth.

**Set**

Upstage right we will build a triangular shaped stage of a meter height, with a width of 5.70 meters and a depth of 3.5 meters. On the front edge of the stage we will place a projection-screen with a height of 3.6 meters. This will give the front of the set a total height of 4.6 meters. At the backside of the set we build a ladder with a height of 5 meters. See drawing for more information.

**Dance floor**

We will bring our own blue colored dance floor and place it over the venue's dance floor.

**Company**

The company consists of 4 dancers, 2 technicians, 1 driver and during open performances a host. On performance days, the stage has to be available at least 2.5 hours before performance so that our dancers can warm up. We need at least one dressing room equipped with a shower and towels.

**Contact**

If you have any questions, don't hesitate to contact us. U can contact us during office hours and ask for Yannick de Regt.
