<b>TEMPERATURE STAGE</b>	: minimal 20 gr. C
<b>TECHNICAL CREW DE STILTE</b>	: 1 person
<b>TECHNICAL CREW THEATRE</b>	: Please provide a minimal of 2 technicians

---

### Lights:

We bring a set of 8 moving heads, including which we'll hang into the fly bars (see attached light plot). We would like to use three 50 degree profile spots from the venue houselights. We will bring our own light board.

### Sound:

We'd like to use the venue's sound system, front of house and two monitors on stage. We will bring our own soundboard.

### Stage:

We will bring the following as our decor; a beige dance floor with on top a wooden bed, table and two chairs.

At the back of the stage we will fly a bar with a length of 4 meters. This bar contains a pulley system with on one side a white cloth and on the other side an hourglass system.

From the center of the stage towards the front left side of the stage (viewed from the audience) there will be another pulley system with on one side the table attached and on the other side another hourglass.

Both hourglasses are filled with regular sand and will be emptied out on stage during the show. We will provide a vacuum cleaner to clean up after the show.

### Company

The company will arrive with 2 dancers, one technician and a tour manager. On performance days we need access to the stage at least 2,5 hours prior to the performance in order for our dancers to warm up and rehearse. The set will be transported by a box truck, please ensure a parking space next to the theatre.

**Dressing rooms**

We require at least one dressing room. The room must be clean, well lit and heated. Each room must be equipped with tables, adequate lighting for make-up, chairs, mirrors, toilets, sinks and showers as well as a costume rack, hangers and towels.

**Contact**

For additional information or questions you could reach us during office hours and ask for Yannick de Regt.
